

Application Hosting Service

MPulse Means Free Hosting™

You're busy focusing on the maintenance of your organization's critical assets. You don't have time to worry about buying, setting up, and maintaining servers to run your maintenance software, too. MPulse's Application Hosting Service (AHS) takes that burden off your hands. Our professionally managed cloud hosting environment ensures your MPulse database is always optimized for fast performance, always backed up, and available when you need it. **Even better, AHS is always free for customers with an active MPulse Maintenance and Support Program (MSP) subscription.**

Own Your Data

With the AHS, you own the user rights to the MPulse application, databases, any custom configurations you've created, and any data you've entered into the application. You own your data and can access it at any time. And, if at any time you decide to take your application hosting in-house, we'll help with the transfer as part of your MSP subscription.

World Class Technology + World Class Hosting

We've combined MPulse's world-class software with a world-class data center managed by Rackspace, the #1 managed cloud company. That means your users can access the MPulse application via web browser from anywhere with a reliable high-speed Internet connection. All connectivity is through standard web ports, and in most cases no special configuration is required.

You focus on maintenance; we'll take care of your cloud hosting!

Efficient, Fast, Secure

The MPulse Application Hosting Service gives you...

- Lower infrastructure costs
- Less technical complexity
- A more solid and secure hosting environment
- Faster connections
- Better performance
- A server capacity that's double the standard installation requirements
- High reliability
- Fast implementation of patches, updates, and upgrades

Rackspace (NYSE: RAX), the #1 managed cloud company, helps businesses tap the power of cloud computing without the complexity and cost of managing it on their own. Rackspace engineers deliver specialized expertise, easy-to-use tools, and Fanatical Support® for leading technologies developed by AWS, Google, Microsoft, OpenStack, VMware, and others. The company serves approximately 300,000 businesses worldwide, including two-thirds of the FORTUNE 100. Rackspace was named a leader in the 2015 Gartner Magic Quadrant for Cloud-Enabled Managed Hosting, and has been honored by Fortune, Forbes, and others as one of the best companies to work for.
