

# Asset Status Board

**MPulse Means Better Visibility™**

## See the Health of All Your Assets

MPulse Asset Status Board provides a single-screen view of the health of your entire production line, facilities footprint, or fleet of vehicles. Square boxes (“cells”) can be configured to represent production lines, departments, systems, or individual assets. These cells are color-coded according to criteria you’ve defined. You can choose whatever colors you’d like to indicate current status—healthy, underperforming, or critical failure.

## Key Features

- A cell can represent a single production asset or grouping of assets.
- The color of the cells changes as asset status changes.
- Click into any cell to view maintenance requests or current work orders for that cell.
- Work requests can be processed directly from the ASB.

You should never have to wait for business-critical information. MPulse Asset Status Board—the fastest, easiest way to keep an eye on your organization’s maintenance needs.

## Have Multiple Sites?

Need to track a complex operation with multiple sites? Enterprise ASB allows you to scale across multiple MPulse databases or locations, so you can track across your entire organization. Enterprise ASB is part of the MPulse Multisite Connector.
