

MPulse Workshop

MPulse Means Successful Implementations™

Prerequisite

Attendee must attend MPulse Fundamentals or have working knowledge of MPulse prior to registering for MPulse Workshop.

Target Audience

Staff responsible for MPulse implementation setup.

Description

Work with MPulse engineers and consultants to review maintenance management best practices and then apply these practices to your MPulse implementation to meet your organization's CMMS goals. MPulse brings 60 collective years of best practices for engineering successful implementations.

You'll receive a full day's worth of structured 'one-on-one' time with an MPulse consultant, who will help you configure key areas of your system. Your MPulse consultant will help you with define your unique global fields, dropdown lists, and customizations to increase ease of use, organizational integration, data integrity, and reporting accuracy.

MPulse Workshop will assist in new customers with a database structure that is prepared to meet workflow and reporting goals. Existing customers leave with a working database cleaned up and calibrated to deliver a return on investment (ROI).

Invite key members of your team, we recommend 3-4 decision makers.

Cancellation and Rescheduling Policies
